

Using Eva to Monitor HMIS Data Quality

MD BOS HMIS MONTHLY REFRESHER TRAINING:
DECEMBER 2024

Using Eva to Monitor HMIS Data Quality

- Eva is a tool that exists outside of HMIS
- Requires an upload of the '*Hashed HMIS CSV*' report from HMIS
- This training will walk you through:
 - How to Run the 'Hashed HMIS CSV'
 - Downloading the export from Community Services
 - How to upload the export to Eva
 - How to utilize the results from Eva to complete data corrections in HMIS

The screenshot shows a webpage titled "Resources" with a dark blue header. Below the header, there are five white boxes with orange borders, each containing a guide or video link. The first four boxes are arranged in a row, and the fifth box is positioned below them on the left side. Each box has a title, a brief description, and a "View the Guide" or "View the Demonstration" link.

Resources			
Eva Overview Guide This guide provides an overview of Eva including, what kind of tool Eva is, what Eva can do for communities, how to use Eva, how data is handled in Eva, and more.
